Issued by: shenzhenbeibeiyoushangwuyouxiangongsi
Product: Bluetooth RGB LED Strip (controlled by duoCo- Strip APP)

This transparency statement complies with Regulation (EU) 2023/2854 (EU Data Act), describing data generated, stored and processed by this Bluetooth- connected product.

1. Types of data generated

1. Non - personal data: light brightness, color settings, device connection status. Data is exchanged locally between LED controller and smartphone via Bluetooth only. The product can work without internet access.
2. Personal data: **No personal data is generated or collected by this product**.
This product does NOT collect location, audio or video data. Microphone permission is used locally on phone only for music- sync light effect; audio is never stored or uploaded.

2. Estimated volume of data
Small volume of parameter data only generated during manual light adjustment. Almost no data generated during standby. No continuous data streaming.
3. Data format & collection mode
Data format: binary lighting control commands.
Collection mode: local Bluetooth communication only, NO cloud upload; no remote real- time data collection.
4. Data storage location & retention period
- Storage: lighting profiles are saved **locally on user’s smartphone**. LED controller has no persistent memory; all temporary settings are lost after power- off. No cloud storage is used.
- Retention: user settings remain on phone until user clears app cache / uninstalls APP. All temporary data on hardware is erased after power- cycle.
5. User rights- access, export, erase
- Access / Export: There is no cloud- hosted data. All settings reside on end- user mobile device.
- Erase data: Clear app cache or uninstall mobile APP; power- cycle LED controller to wipe all temporary hardware- side data.
6. Data sharing
Neither hardware nor matching APP shares any data with third parties.
7. Service & API
This product **does NOT provide API / SDK access**.
